

# CONSERVE WATER NOTICE

Effective 3/11/19 – 3/30/19

This notice is to serve the purpose of notifying the customers of the Circle Oaks Water District that a “CONSERVE WATER ORDER” is in effect due to the continued increased of Iron levels in the raw water reserves making it difficult to produce as much water as residents are currently using. The rains are now subsiding so we should be back to normal in 2-3weeks.

This means that there should be NO:

- Outdoor watering of any kind
- Water used for unnessesary cleaning (boats, cars, walkway, ect.)
- Filling ponds or pools
